

**Amendments to the Claims:**

The following listing of claims will replace all prior versions, and listings, of claims in the application:

1. (Currently Amended) A method for forming a film on a substrate, comprising: discharging a liquid material using an inkjet discharge device from a nozzle of a head to the substrate to form a film on the substrate, the liquid material including a solvent and a solute, the solvent including a heterocyclic compound, the heterocyclic compound having a furan skeleton, a boiling point of the heterocyclic compound being greater than 170°C, and the solvent including a benzene derivative.

2-10. (Canceled)

11. (Currently Amended) A method of forming a film on a substrate, comprising: discharging a liquid material using an inkjet discharge device from a nozzle of a head to the substrate to form a film on the substrate, the liquid material including a solvent and a solute, the solvent including a heterocyclic compound, the heterocyclic compound having a furan skeleton, and a boiling point of the heterocyclic compound being greater than 170 degrees centigrade.

12. (Currently Amended) The method according to claim 11, the solvent heterocyclic compound including 2,3-dihydrobenzofuran.

13. (Previously Presented) The method according to claim 11, the solvent including a benzene derivative.

14. (Previously Presented) The method according to claim 11, a vapor pressure of the solvent at room temperature being less than 10 mmHg and greater than 0.10 mmHg.

15. (Previously Presented) The method according to claim 11, the solute including a semiconductor material.

16. (Previously Presented) The method according to claim 11, the solute including a conductive material.

17-18. (Canceled)

19. (New) The method according to claim 1, the heterocyclic compound excluding furan and tetrahydrofuran.

20. (New) The method according to claim 11, the heterocyclic compound excluding furan and tetrahydrofuran.

21. (New) The method according to claim 1, wherein the heterocyclic compound is benzofuran or 2,3-dihydrobenzofuran.

22. (New) The method according to claim 11, wherein the heterocyclic compound is benzofuran or 2,3-dihydrobenzofuran.
